

IRONWOOD CAMPSITE: CHANGES IN 2012

OLD...

NEW!!!

- Campsite moved from the west side of the sandspit to a better location on the east side.
- Changes were made to protect cultural and natural resources to provide a nicer campsite for visitors.
- Three tent pads are provided for visitor use. Tents need to be pitched within the pad areas.
- A floating boardwalk has been provided for access to the new campsite and to protect the fragile dune vegetation.
- Thousands of native beach plants were grown from local seeds and planted in restoration efforts of such a fragile system.

PLEASE HELP PROTECT THIS SANDSPIT

- **STAY ON BOARDWALK**
- **AVOID NEWLY PLANTED VEGETATION**
- **KEEP TENTS IN PADS**

HAVE A GREAT VISIT!

Any questions contact Peggy Burkman (peggy_burkman@nps.gov)
